## DOT BUILDING BLOCK SYSTEM FOR AIR BRAKE APPLICATIONS

These kits contain a wide variety of standard and metric components to assemble your own DOT air brake coupling using the Raufoss building block system. Raufoss Couplings meet all applicable standards for brake systems and are designed and optimized for minimum pressure loss, and provide a lasting, and robust temperature-independent sealing function. Raufoss couplings can provide savings compared with traditional coupling solutions in both total cost of ownership and weight reduction. Choose your building block, push-in coupling based on your desired tubing size, and complete the block with a metric or NPT swivel.

**KAQRK-1 \$649.99**  
**Metric & NPT Building Block Kit 166-Piece**
