## NEW STARTERS

### FEATURES & BENEFITS:

Over Crank Protection (OCP). OCP monitors the internal temperature and prevents thermal damage to the starter by preventing overcranking.

Integrated Over Crank Protection (IOCP) is a built-in circuit breaker, protects the starter from thermal damage, automatically resetting at a safe operating temperature, while eliminating the need for a wiring harness.

These models feature an Integral Magnetic Switch (IMS). IMS reduces voltage drop and ensures the solenoid receives the maximum available voltage in any starting condition.
