

# SureCan Safty Gas Cans

## PRODUCT OVERVIEW

The flexible spout rotates down more than 180 deg and fits greatly into any machines fill location while the thumb release trigger on top controls the flow. By pulling straight back on the safety trigger and then down on the thumb button fuel is released immediately while you stay in complete control the entire time. When you notice your fill tank is almost full slowly release the thumb button and allow the excess fuel to drain from the top of the spout before rotating it back-up. No more bending over and tipping your fuel can forward and holding it in an awkward position. The SureCan is a high-quality fuel dispensing machine.

SURECAN Safety Can,  
2.2 gal, HDPE, Red **\$48.00**  
08 SUR2SFG2 **3 or more \$45.99**
