## Diesel Kleen + Cetane Boost

Diesel Kleen +Cetane Boost is a total injector cleaner and performance improver that cleans injectors, boosts cetane and lubricates fuel injection components. To realize the benefits of today's cleaner-burning fuels, new technology is required to maximize performance. It restores lost power and fuel economy and smooths rough-running engines.

Diesel Kleen can be used year-round, but it is not a diesel fuel winterizer or antigel. When winter temperatures drop below + 30°F. use Diesel Fuel Supplement +Cetane Boost (in the white bottle) to provide maximum winter protection for your diesel engine.

Part Number	Pkg	Container Size	Treats Gallons	Special
PS 03026-12	12	26 oz Plastic	100	\$8.05
PS 03064-06	6	64 oz Plastic	250	\$15.35
PS 03128-04	4	1-Gal Plastic	1000	\$46.39
PS 03850-02	2	2 1/2 Gal Plastic	3750	\$112.17
PS 03855-01	1	55 Gal Drum	82,500	\$2,340.07

## Clear-Diesel Fuel and Tank Cleaner

Part Number Pkg	Container Size	Treats Gallons	Special
PS 09226-12 12	26 oz Plastic	100	\$10.89
PS 09264-06 6	64 oz Plastic	250	\$22.69
Part Number Pkg	Container Size	Treats Gallons	Special
PS 09250-02 2	2 1/2 Gal Plastic	2,500	\$137.14

Clear-Diesel Fuel & Tank Cleaner is an advanced diesel fuel and tank cleaning technology. Water has always been a problem in diesel fuel. But today's cleaner-burning fuels have dramatically reduced sulfur content and are more prone to water separation, contamination and are inherently unstable. This Fuel Polishing Formula removes water and slime, disperses fuel contaminants and stabilizes fuel during long-term storage. It can be used as a vital part of any preventive maintenance program or for immediate clean-up of equipment or fuel storage tanks. Add Clear-Diesel at least quarterly or as needed.

## Bio-Kleen Diesel Fuel Biocide

Part Number Pkg	Container Size	Treats Gallons	Special
PS 09016-09 9	16 oz Plastic	880	\$31.09

Bio Kleen Diesel Fuel Biocide kills microbes in diesel fuel. The dramatically reduced sulfur content in today's cleaner burning fuels has created ideal opportunities for microbes to grow in fuel tanks. The first indication of microbial contamination is mucous-like accumulations on fuel-filters and increased requirements for fuel-filter replacement. The only way to get rid of microbial contamination is to kill the microbes with a biocide.
